

## Photon Photovoltaic Technology Show 2010 Europe

Stuttgart: Hall 4, Stand F29

### Araldite® Shows off Leading PV Technologies

Araldite® products for use across a broad range of solar power generation applications, from photovoltaic wafer and module production and photovoltaic thin film technology to concentrated thermal power, electronic and electrical applications, will be on show.

One example of new technology is Araldite® 2015, which with TÜV design and type approval, is suitable for the production of photovoltaic modules. What makes Araldite® 2015 different is that it allows a module design and construction with improved heat transfer and efficiency without sacrificing strength and bonding features.

Also on show is Huntsman's Probimer® range of high performance photoimageable Solder Masks for use on inverters. The Probimer® range is characterised by its excellent resistance at high temperatures (up to 150°C), its high resolution and excellent thermal cycling resistance. It offers both high dielectric strength and comparative tracking index. In use, Probimer® is suitable for the laser bar code process and is compatible even with aggressive post solder mask processes.

Huntsman Advanced Materials is bringing more than 60 years of innovation in composites, adhesives and insulating resins to the solar energy market. To help new technologies achieve large scale commercial viability, it is actively working with partners to introduce new technologies that will improve efficiency and reduce production costs.

Huntsman Advanced Materials is rising to the challenge of a new era for renewable energy and power generation.

#### About Huntsman:

Huntsman is a global manufacturer and marketer of differentiated chemicals. Its operating companies manufacture products for a variety of global industries, including chemicals, plastics, automotive, aviation, textiles, footwear, paints and coatings, construction, technology, agriculture, health care, detergent, personal care, furniture, appliances and packaging. Originally known for pioneering innovations in packaging and, later, for rapid and integrated growth in petrochemicals, Huntsman today has more than 12,000 employees and operates from multiple locations worldwide. The Company had 2009 revenues of approximately \$8 billion. For more information about Huntsman, please visit the Company's website at [www.huntsman.com](http://www.huntsman.com).

#### Forward Looking Statements:

*Statements in this release that are not historical are forward-looking statements. These statements are based on management's current beliefs and expectations. The forward-looking statements in this release are subject to uncertainty and changes in circumstances and involve risks and uncertainties that may affect the company's operations, markets, products, services, prices and other factors as discussed in the Huntsman companies' filings with the US Securities and Exchange Commission. Significant risks and uncertainties may relate to, but are not limited to, financial, economic, competitive, environmental, political, legal, regulatory and technological factors. In addition, the completion of any transactions described in this release is subject to a number of uncertainties and closing will be subject to approvals and other customary conditions. Accordingly, there can be no assurance that such transactions will be completed or that the company's expectations will be realized. The company assumes no obligation to provide revisions to any forward-looking statements should circumstances change, except as otherwise required by applicable laws.*
