

STRAMAMPS

DER Sondermaschinenbauer

Quick and safe
PV-testing is only
a flash away

Moving the limits together.
Constantly.

With efficient
and economical
LEDs

We're never satisfied. That's why we develop leading edge testing, assembly and automation technology for core industries like automotive and photovoltaics.

Testing System ProMoSim

The world's first sun simulator with LEDs has proven its precision and reliability in practice.

Contacting System ProMoBraz

The world's first contacting system for induction brazing of thin-film modules guarantees high throughput and 100% process reliability.
